PROFILE

As a highly skilled front-end developer, I have a proven track record of building interactive and responsive websites and web applications. My primary areas of expertise are in HTML, CSS, JavaScript, and Vue.js. In addition, I am proficient in other JS frameworks and programming languages, which allows me to work on diverse projects and deliver high-quality results.

EMPLOYMENT HISTORY

Principal Front-End Developer, Éditions du Journal de l'assurance

Montréal

May 2022 — Present

- Successfully established a new front-end architecture that improved scalability and performance of the company's website.
- Developed secure, interactive web applications using Vue.js that provided an intuitive user interface for users.
- Created a new subscription payment flow with Stripe, enabling seamless payment transactions and increased revenue.
- Developed a custom UI library that increased productivity and code reusability, resulting in more efficient development processes and a streamlined user experience.
- Replaced the current front-end architecture from Django to Vue.js, resulting in a modern and responsive website with improved user engagement.

Front-End Developer, Boite Beet

Québec

Oct 2021 — Apr 2022

- Led the front-end development of medium to large-scale web projects for renowned clients in Quebec and Canada.
- Utilized WordPress headless CMS and Nova CMS for seamless content integration with Vue.js, resulting in an efficient and user-friendly development process.
- Created new reusable components for the UI-Kit, resulting in a streamlined development process, increased productivity, and a consistent user interface across all projects.
- Collaborated closely with the design team to ensure seamless integration of design elements and created custom animations and interactions to enhance the user experience.

Front-End Developer, Freelancing / Consulting

Québec

Mar 2020 — Present

- Ensured compliance with SASS and front-end standards and conventions, resulting in a consistent and maintainable codebase.
- Led new web projects as both a developer and project manager for multiple clients, ensuring successful project delivery within budget and on time.
- Demonstrated the ability to understand client needs and provide appropriate solutions to meet their requirements.

- Successfully translated design systems into code while ensuring the responsiveness and reusability of components, resulting in a consistent and polished user interface across the website.

EDUCATION

DEC in Web Application Development, College Limoilou

Québec

Aug 2018 — Jul 2021

Bac in Mathematical Sciences, Pythagore High School

Mohammedia

Sep 2015 — Jun 2018
